1. The suspension period set on 3/12/03, due to a potential interference, has expired. Due to the reference (which potentially may result in an interference with this application) having priority date of 3/13/00 which predates applicants' priority date of 2/16/01 by more than 6 months a rejection based on such follows.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 4-6, 9-14, and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miller, II (6550160) in view of either O'Brien (3218734), Wellman (4875683), or Chiroff (4407079).

Miller, II shows a pair of shoes with a sealed bag (22) located on the outside portion (lateral portion under the small toe) of the sole, a hand pump 48), and release valve (20) substantially as claimed except for the bag being located in the forward portion of the sole. Miller, II is silent as to the longitudinal location of the bag. O'Brien, Wellman, or Chiroff teaches that the location for medial/lateral augmenting devices for golfing should be located in the forward portion of the shoe sole. It would have been obvious to locate the angling device in the forward portion as taught by either O'Brien, Wellman, or Chiroff in the pair of shoes of Miller, II to provide proper, secure angling of the foot for golfing.

4. Claims 7, 8, 15, and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over the references as applied to claims 4-6, 9-14, and 17 above, and further in view of either Goldston (5588227) or Cohen (5113599).

Miller, II as modified above shows a pair of shoes substantially as claimed except for the hand pump and release valve being located on the tongue. Goldston or Cohen teaches placing hand pumps and valves on tongues of footwear. It would have been obvious to place the pump and valve on the tongue as taught by either Goldston or Cohen in the shoes of Miller, II as modified above to make the pump easier to access.
